This annual shareholder report contains important information about Sit Quality Income Fund for the period of April 1, 2024 to March 31, 2025. You can find additional information about the Fund at www.sitfunds.com/documents. You can also request this information by contacting us at 1-800-332-5580.

What were the Fund's costs for the last year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Sit Quality Income Fund - Class Y	\$57	0.55%

How did the Fund perform in the past 12 months and what affected its performance?

For the 12-month period ended March 31, 2025, the Sit Quality Income Fund - Class Y returned +5.82%, outperforming the Bloomberg U.S. 1-3 Year Gov't/Credit Index's return of +5.61%. The Federal Reserve reduced short-term interest rates by 1.00% which caused the yield curve to steepen and prices on shorter term securities to increase. The Fund benefited from a strong income advantage relative to the benchmark and was the primary source of outperformance. The Fund's allocation to corporate bonds outperformed as the duration of those securities were generally longer than the benchmark and spreads narrowed causing prices to increase. The Fund reduces interest rate risk by using futures and options on Treasury securities. The use of futures and options was effective in providing stability to the Fund's net asset value but detracted from overall performance.

How did the Fund perform over the last 10 years?

The Fund continues to use the Bloomberg 1-3 Year Government/Credit Bond Index as an additional benchmark.

The line graph above shows the value of a hypothetical \$10,000 investment in the Fund over the past 10 fiscal years (or since inception if shorter). The graph above and table below are total returns, which assume the reinvestment of dividends and capital gains, if any. Neither the Fund's returns nor the index returns reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund shares. **The Fund's past performance is not a good predictor of the Fund's future performance.** Updated performance information is available at www.sitfunds.com/documents.

Average Annual Total Returns (as of 03/31/25)

	1 Year	Since Inception 4/1/2022
Sit Quality Income Fund - Class Y	5.82%	3.34%
Bloomberg U.S. Aggregate Bond Index	4.88%	0.52%
Bloomberg 1 - 3 Year Government/Credit Index	5.61%	3.09%

What did the Fund invest in?

Fund Statistics (as of 03/31/25)

Total Net Assets	\$135,566,167
# of Portfolio Holdings	172
Portfolio Turnover Rate	59.03%
Investment Advisory Fees Paid	\$256,860
Average Maturity	18.8 Years
Effective Duration ¹	2.7 Years

¹ Duration is a measure of estimated price sensitivity relative to changes in interest rates. Portfolios with longer durations are typically more sensitive to changes in interest rates. For example, if interest rates rise by 1%, the fair value of a security with an effective duration of 5 years would decrease by 5%, with all other factors being constant. The correlation between duration and price sensitivity is greater for securities rated investment-grade than it is for securities rated below investment-grade. Duration estimates are based on assumptions by Sit Investment Associates, Inc. (the "Adviser") and are subject to a number of limitations. Effective duration is calculated based on historical price changes of securities held by the Fund, and therefore is a more accurate estimate of price sensitivity provided interest rates remain within their historical range.
