What were the Fund's costs for the last year?

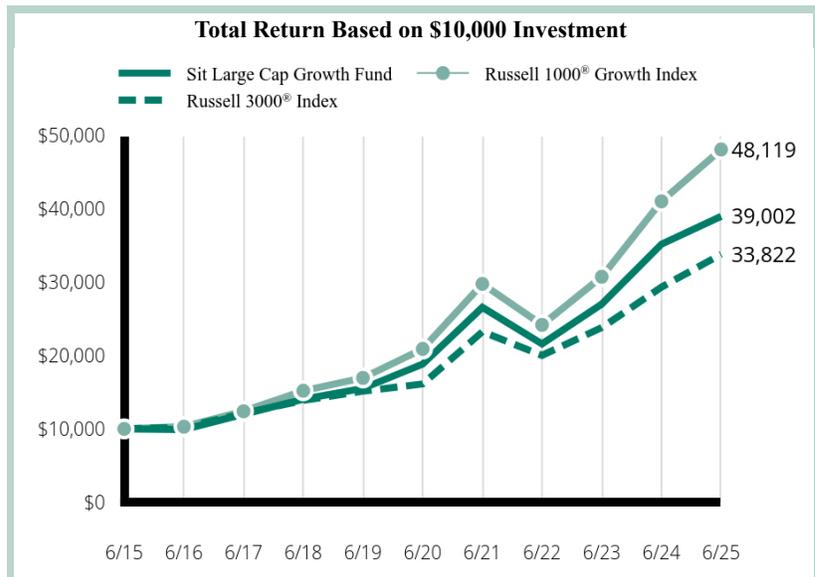

(based on a hypothetical \$10,000 investment)

Fund Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Sit Large Cap Growth Fund	\$105	1.00%

How did the Fund perform in the past 12 months and what affected its performance?

For the 12-month period ended June 30, 2025, the Sit Large Cap Growth Fund returned +10.79%, underperforming the Russell 1000® Growth Index's return of +17.22%. During the period, stock selection in the technology services sector was the largest detractor from performance. In this sector, an underweight position in Palantir (+438%) combined with overweight positions in Alphabet (-3%) and Adobe (-30%) weighed on returns. Stock selection in the health services sector also detracted from performance during the period, as the Fund held positions in equities that declined, such as UnitedHealth Group (-38%) and Centene (-18%). Augmenting returns during the period were an overweight position in the electronic technology sector, combined with strong stock selection. Key contributors to performance here include positions in Broadcom (+73%) and not owning underperforming equities such as Qualcomm (-18%). Additionally, an overweight position in producer manufacturing and positive stock selection in finance contributed to improved performance.

How did the Fund perform over the last 10 years?

The Fund continues to use the Russell 1000® Growth Index as an additional benchmark.

The line graph above shows the value of a hypothetical \$10,000 investment in the Fund over the past 10 fiscal years (or since inception if shorter). The graph above and table below are total returns, which assume the reinvestment of dividends and capital gains, if any. Neither the Fund's returns nor the index returns reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund shares. **The Fund's past performance is not a good predictor of the Fund's future performance.** Updated performance information is available at www.sitfunds.com/documents.

(2) Significant Accounting Policies

The Funds are investment companies and follow accounting and reporting guidance under Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946, “Financial Services-Investment Companies”. The following is a summary of significant accounting policies consistently followed by the Funds in the preparation of their financial statements in conformity with U.S. generally accepted accounting principles (“GAAP”).

Investments in Securities

Investments in securities traded on national or international securities exchanges are valued at the last reported sales price prior to the time when assets are valued. Equity securities traded on the over-the-counter market are valued at the last reported sales price or if the last sales price is not available, at the last reported bid price. The sale and bid prices or prices deemed best to reflect fair value quoted by dealers who make markets in these securities are obtained from independent pricing services. Consistent with the Funds’ valuation policies and procedures, debt securities maturing in more than 60 days are priced by an independent pricing service. The pricing service may use models that price securities based on current yields and relative security characteristics, such as coupon rate, maturity date, issuer credit quality, and

prepayment speeds as applicable. When market quotations are not readily available, or when Sit Investment Associates, Inc. (the “Adviser” or “SIA”) becomes aware that a significant event impacting the value of a security or group of securities has occurred after the closing of the exchange on which the security or securities principally trade, but before the calculation of the daily net asset value, securities are valued at fair value as determined in good faith using procedures established by the Funds’ Board of Directors. The procedures consider, among others, the following factors to determine a security’s fair value: the nature and pricing history (if any) of the security; whether any dealer quotations for the security are available; and possible valuation methodologies that could be used to determine the fair value of the security. Debt securities of sufficient credit quality maturing in less than 60 days when acquired, or which subsequently are within 60 days of maturity, are valued at amortized cost, which approximates fair value.

Security transactions are accounted for on the date the securities are purchased or sold. Securities gains and losses are calculated on the identified-cost basis. Dividend income is recorded on the ex-dividend date or upon the receipt of ex-dividend notification in the case of certain foreign securities. Interest income is recorded on an accrual basis, including level-yield amortization of long-term bond premium and discount using the effective yield method.

Fair Value Measurements

The inputs and valuation techniques used to measure fair value of the Funds’ investments are summarized into three levels as described in the hierarchy below:

- Level 1 – quoted prices in active markets for identical securities. An active market for the security is a market in which transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis. A quoted price in an active market provides the most reliable evidence of fair value.
- Level 2 – debt securities are valued based on evaluated prices received from independent pricing services or from dealers who make markets in such securities. For corporate bonds, U.S. government and government agency obligations, and municipal securities the pricing services utilize matrix pricing which considers yield or price of bonds of comparable quality, coupon, maturity, and type as well as dealer supplied prices. For asset-backed securities and mortgage-backed securities, the pricing services utilize matrix pricing which considers prepayment speed assumptions, attributes of the collateral, yield or price of bonds of comparable quality, coupon, maturity, and type as well as dealer supplied prices. For foreign equities, the pricing services adjust closing prices by applying a systematic process for events occurring after the close of the foreign exchange by utilizing such inputs as Depositary Receipts, quoted prices for similar securities, exchange rates, and certain indexes. All of these inputs are derived principally from or corroborated by observable market data. An adjustment to any observable input that is significant to the fair value may render the measurement a Level 3 measurement.
- Level 3 – significant unobservable inputs, including the Adviser’s own assumptions in determining the fair value of investments. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

A summary of the levels for the Funds’ investments as of June 30, 2025 is included with the Funds’ schedules of investments.

Foreign Currency Translations and Forward Foreign Currency Contracts

The fair value of securities and other assets and liabilities denominated in foreign currencies for Global Dividend Growth, ESG Growth, International Growth and Developing Markets Growth Funds are translated daily into U.S. dollars at the closing rate of exchange (approximately 4:00 p.m. Eastern Time). Purchases and sales of securities, income and expenses are translated at the exchange rate on the transaction date. Dividend and interest income includes currency exchange gains (losses) realized between the accrual and payment dates on such income. Exchange gains (losses) may also be realized between the trade and settlement dates on security and forward contract transactions. For securities denominated in foreign currencies, the effect of changes in foreign exchange rates on realized and unrealized gains or losses is reflected as a component of such gains or losses.

The Global Dividend Growth, ESG Growth, International Growth and Developing Markets Growth Funds may enter into forward foreign currency exchange contracts generally for operational purposes, but the Adviser may occasionally utilize contracts to protect against adverse exchange rate fluctuation. Any gains (losses) generated by these contracts are disclosed separately on the statements of operations.

NOTES TO FINANCIAL STATEMENTS

June 30, 2025 (Continued)

The net U.S. dollar value of foreign currency underlying all contractual commitments held by the Funds and the resulting unrealized appreciation or depreciation is determined using foreign currency exchange rates from an independent pricing service. The Funds are subject to the credit risk that the other party will not complete the obligations of the contract.

Federal Taxes

The Funds' policy is to continue to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of their taxable income to shareholders. Therefore, no income tax provision is required. In order to avoid the payment of any federal excise taxes, the Funds will distribute substantially all of their net investment income and net realized gains on a calendar year basis. Also, the Funds may utilize equalization accounting for tax purposes, whereby a portion of redemption payments are treated as distributions of income or gain for income tax purposes.

Management has analyzed the Funds' tax positions taken in federal tax returns for all open tax years and has concluded that as of June 30, 2025, no provision for income tax would be required in the Funds' financial statements. The Funds' federal and state of Minnesota income and federal excise tax returns remain subject to examination by the Internal Revenue Service and state departments of revenue until such time as the applicable statute of limitations for audit has expired. For example, U.S. tax returns are generally subject to audit for three years from the date they are filed.

At June 30, 2025, the gross unrealized appreciation (depreciation) on investments and cost of securities on a tax basis for federal income tax purposes were as follows:

	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)	Cost of Securities on a Tax Basis

Net investment income and net realized gains differ for financial statement and tax purposes because of corporate actions on shares held and/or losses deferred due to "wash sale" transactions. A "wash sale" occurs when a Fund sells a security that it has acquired within a period beginning thirty days before and ending thirty days after the date of sale (a sixty one day period). The character of distributions made during the year from net investment income or net realized gains may also differ from its ultimate characterization for tax purposes. Also, due to the timing of dividend distributions, the fiscal year in which amounts are distributed may differ from the year that the income or realized gains (losses) were recorded by the Funds. The tax character of distributions paid during the fiscal years ended June 30, 2025 and 2024 was as follows:

Distributions

Distributions to shareholders are recorded as of the close of business on the record date. Such distributions are payable in cash or reinvested in additional shares of the Funds' capital stock. Distributions from net investment income, if any, are declared and paid quarterly for the Balanced, Dividend Growth, Global Dividend Growth and Small Cap Dividend Growth Funds and declared and paid annually for Developing Markets Growth, Small Cap Growth, International Growth, Mid Cap Growth, Large Cap Growth and ESG Growth Funds. Distributions from net realized gains, if any, will be made annually for each of the Funds.

Concentration of Investments

The Developing Markets Growth Fund may concentrate investments in countries with limited or developing capital markets which may involve greater risks than investments in more developed markets and the prices of such investments may be volatile. The consequences of political, social or economic changes in these markets may have disruptive effects on the market prices of the Fund's investments and the income it generates, as well as the Fund's ability to repatriate such amounts.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported results for the respective periods. Actual results could differ from those estimates.

Guarantees and Indemnifications

Under each Fund's organizational documents, its officers and directors are indemnified against certain liability arising out of the performance of their duties to each Fund. In addition, certain of each Fund's contracts with its service providers contain general indemnification clauses. Each Fund's maximum exposure under these arrangements is unknown since the amount of any future claims that may be made against each Fund cannot be determined and each Fund has no historical basis for predicting the likelihood of any such claims.

Cash Balance Credit Risk

The Funds may place portions of its uninvested cash with financial institutions in the United States, which are insured by the Federal Deposit Insurance Corporation ("FDIC") up to \$250,000 for each account holder. The Funds may be subject to credit risk to the extent amounts on deposit are in excess of the insured limits.

Segment Reporting

The Funds represent a single operating segment. Subject to the oversight and, when applicable, approval of the Board of Trustees, the Chief Executive Officer of the Adviser ("CEO") acts as the Funds' chief operating decision maker ("CODM"), assessing performance and making decisions about resource allocation within the Funds. The CODM monitors the operating results as a whole, and the Funds' long-term strategic asset allocation is determined in accordance with the terms of its prospectus based on a defined investment strategy. The financial information provided to and reviewed by the CODM is consistent with that presented in the Funds' financial statements. Adoption of the new standard impacted the Funds' financial statement note disclosures only and did not affect the Funds' financial position or the results of its operations.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements and financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and financial highlights. Such procedures also included confirmation of securities owned as of June 30, 2025, by correspondence with custodians, transfer agents and brokers, or by other appropriate auditing procedures when replies were not received.
