## What did the Fund invest in?

The Fund primarily invested in municipal securities, offering interest income exempt from federal regular income tax and alternative minimum tax. The tables reflect the investment makeup of the Fund as of September 30, 2025. Portfolio holdings are subject to change.

Fund Statistics (as of 09/30/25)		Quality Ratings (% of Net Assets)	
Total Net Assets	\$132,630,430	AAA	7.6%
# of Portfolio Holdings	310	AA	37.8

Average Maturity	19.8 Years	Less Than BBB	1.1
Effective Duration <sup>1</sup>	6.4 Years	Not Rated	27.0
<sup>1</sup> Duration is a measure of estimated price sensitivity relative to changes in interest rates. Portfolios with longer durations are typically more sensitive to changes in interest rates. For example, if interest rates rise by 1%, the fair value of a security with an effective duration of 5 years would decrease by 5%, with all other factors being constant. The correlation between duration and price sensitivity is greater for securities rated investment-grade than it is for securities rated below investment-grade. Duration estimates are based on assumptions by Sit Investment Associates, Inc. (the "Adviser") and are subject to a number of limitations. Effective duration is calculated based on historical price changes of securities held by the Fund, and therefore is a more accurate estimate of price sensitivity provided interest rates remain within their historical range.
