What were the Fund's costs for the last year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Sit U.S. Government Securities Fund - Class S	\$82	0.80%

How did the Fund perform in the past 12 months and what affected its performance?

For the 12-month period ended March 31, 2026, the Sit U.S. Government Securities Fund - Class S returned +4.16%, outperforming the Bloomberg Intermediate Government Bond Index's return of +3.98%. The Federal Reserve reduced short-term interest rates by 0.75%, which caused the yield curve to steepen. The Fund benefited from the consistent relatively high level of income provided by its holdings in higher coupon government agency mortgages. The Fund reduces interest rate risk by using options on Treasury securities. The use of options was effective in providing stability to the Fund's net asset value but detracted from overall performance. The Fund continued to experience relatively stable prepayment rates as the mortgage holdings are generally well seasoned and have been through many refinancing cycles.

How did the Fund perform over the last 10 years?

The Fund continues to use the Bloomberg Intermediate Government Bond Index as an additional benchmark.

The line graph above shows the value of a hypothetical \$10,000 investment in the Fund over the past 10 fiscal years (or since inception if shorter). The graph above and table below are total returns, which assume the reinvestment of dividends and capital gains, if any. Neither the Fund's returns nor the index returns reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund shares. **The Fund's past performance is not a good predictor of the Fund's future performance.** Updated performance information is available at www.sitfunds.com/documents.

Average Annual Total Returns (as of 03/31/26)

	1 Year	5 Years	10 Years
Sit U.S. Government Securities Fund - Class S	4.16%	1.38%	1.66%
Bloomberg U.S. Aggregate Bond Index	4.35%	0.31%	1.70%
Bloomberg Intermediate Government Bond Index	3.98%	1.00%	1.53%

What did the Fund invest in?

The Fund exclusively invested in U.S. government securities, focusing on high current income relative to market yields. The tables reflect the investment makeup of the Fund as of March 31, 2026. Portfolio holdings are subject to change.

Fund Statistics (as of 03/31/26)		Estimated Average Life	
Total Net Assets	\$196,960,227	0-1 Year	1.1%
# of Portfolio Holdings	159	1-5 Years	92.2
Portfolio Turnover Rate	12.51%	5-10 Years	5.5
Investment Advisory Fees Paid	\$408,661	10-20 Years	1.2
Average Maturity	22.2 Years	Total	100.0%
Effective Duration ¹	3.5 Years		

¹ Duration is a measure of estimated price sensitivity relative to changes in interest rates. Portfolios with longer durations are typically more sensitive to changes in interest rates. For example, if interest rates rise by 1%, the fair value of a security with an effective duration of 5 years would decrease by 5%, with all other factors being constant. The correlation between duration and price sensitivity is greater for securities rated investment-grade than it is for securities rated below investment-grade. Duration estimates are based on assumptions by Sit Investment Associates, Inc. (the "Adviser") and are subject to a number of limitations. Effective duration is calculated based on historical price changes of securities held by the Fund, and therefore is a more accurate estimate of price sensitivity provided interest rates remain within their historical range.
