INVESTMENT OBJECTIVE

The Sit Global Dividend Growth Fund (the "Fund") seeks to provide current income that exceeds the dividend yield of the Fund's benchmark index and that grows over a period of years. Secondarily, the Fund seeks long-term capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables or the examples below.

	Class I	Class S
Shareholder Fees *(fees paid directly from your investment)*		
Redemption Fee *(as a percentage of amount redeemed only on shares held for less than 30 days)*	2.00%	2.00%
Annual Fund Operating Expenses		
(expenses that you pay each year as a percentage of the value of your investment)		
Management Fees	1.00%	1.00%
Distribution (12b-1) fees	None	0.25%
Total Annual Fund Operating Expenses	1.00%	1.25%

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.
It assumes that you invest $100,000 in Class I shares of the Fund and $10,000 in Class S shares of the Fund for the time periods indicated, that your investment has a 5% return each year, that the Fund's operating expenses remain the same, and that you redeem all of your shares at the end of those periods. Although your actual costs and returns may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class I	$1,025	$3,199	$5,549	$12,292
Class S	$128	$399	$690	$1,518

PORTFOLIO TURNOVER

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 4.85% (both classes) of the average value of the portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks to achieve its objectives by investing, under normal circumstances, at least 80% of its assets in equity securities of dividend growth companies. For purposes of the 80% policy, the Fund defines dividend growth companies as companies that (i) have paid or declared a dividend during the past 12 months, and (ii) have sales or earnings growth rates within the range of sales or earnings growth rates of companies appearing in the MSCI World Index during the past 12 months.

For purposes of the 80% investment policy the term “assets” means net assets plus the amount of any borrowings for investment purposes.

The Fund’s diversified portfolio is designed to have lower volatility than that of the MSCI World Index, but with a higher yield and greater prospects for dividend growth.

Sit Investment Associates, Inc. (the "Adviser") invests in dividend paying growth-oriented companies it believes exhibit the potential for growth and growing dividend payments. The Adviser believes that a company’s earnings growth is a primary determinant
of its potential long-term return, and that a record of increasing dividend payments is a strong indicator of financial health and growth prospects. By investing in dividend paying stocks it is anticipated that the holdings will tend to be in large to medium-sized companies (companies with market capitalization in excess of $2 billion).

The Adviser considers several factors in its evaluation of a company’s potential for above average long-term earnings, revenue, and dividend growth, including:

- a record of paying dividends,
- strong prospects for growing dividend payments indicated in part by growing earnings and cash flow,
- unique product or service,
- growing product demand,
- dominant and growing market share,
- management experience and capabilities, and
- strong financial condition.

Since stocks that pay dividends tend to be less volatile and may not experience the same capital appreciation as stocks that don’t pay dividends, the Fund’s diversified portfolio of dividend paying stocks is expected to have lower volatility than that of the MSCI World Index, but with a higher dividend yield and greater prospects for dividend growth.

The Fund diversifies its investments among a number of different countries throughout the world. Under normal circumstances, the Fund will invest at least 40% of its net assets in stocks of foreign companies drawn from at least three different countries (and at least 30% of its net assets in stocks of foreign companies if market conditions are deemed unfavorable).

The Fund may invest in open-end investment companies (mutual funds) and closed-end investment companies which invest in the same types of securities in which the Fund may invest directly.

When selling equity securities for the Fund, the Adviser considers several factors, including changes in the company’s fundamentals, anticipated earnings, anticipated dividend payments and financial position.

PRINCIPAL INVESTMENT RISKS

You could lose money by investing in the Fund. The principal risks of investing in the Fund are listed below. Different risks may be more significant at different times, depending on market conditions or other factors.

- **Market Risk**: The market value of securities may fall, sometimes rapidly and unpredictably. These declines may be due to factors affecting a particular issuer, or the result of, among other things, political, regulatory, market, economic or social developments affecting the market(s) generally. Local, regional or global events such as war, acts of terrorism, other armed conflicts, tariffs, the spread of infectious illness, epidemics or other public health issues, recessions, market instability, or other events could have a significant impact on the Fund and its investments and potentially increase the risks described herein.

- **Dividend Paying Company Risk**: The Fund's income objective may limit its ability to appreciate during a broad market advance because dividend paying stocks may not experience the same capital appreciation as non-dividend paying stocks. In addition, stocks held by the Fund may reduce or stop paying dividends which could affect the Fund's ability to generate income.
- **International Investing Risk:** International investing involves risks not typically associated with investing in U.S. securities which may adversely affect the Fund's investment. These risks include currency risk, foreign securities market risk, foreign tax risk, information risk, investment restriction risk, and political and economic risks.
- **Mid Cap Stock Risk**: Stocks of mid cap companies may be subject to more abrupt or erratic market movement than stocks of larger, more established companies.
- **Growth Style Investing Risk**: Different types of stocks tend to shift into and out of favor with stock market investors depending on market and economic conditions. The Fund invests in growth style stocks. The Fund's performance may at times be better or worse than the performance of funds that focus on other types of stocks or that have a broader investment style.
- **Sector Risk**: To the extent the Fund invests a significant portion of its assets in the securities of companies in the same sector of the market or region, an adverse economic, business or political development affecting that sector or region may affect the value of the Fund's investments more, and the Fund's investments may be more volatile, than if its investments were not so concentrated in such economic sector or geographic region.
- **Management Risk:** A strategy used by the investment management team may not produce the intended results.
- **Investment Company Risk:** To the extent that the Fund invests in shares of another investment company, it will indirectly absorb its pro rata share of such investment company's operation expenses, including investment advisory and administrative fees, which will reduce the Fund's return on such investment relative to investment alternatives that do not include such expenses. In addition, the ability of the Fund to achieve its investment objective will partially depend upon the ability of the acquired fund to achieve its investment objective.
- **Cybersecurity Risk**: Cybersecurity breaches may allow an unauthorized party to gain access to Fund assets, shareholder data, or proprietary information, or cause the Fund and/or its service providers to suffer data corruption or lose operational functionality. The issuers of securities in which the Fund invests are also subject to cybersecurity risks, and the value of these securities could decline if the issuers experience cyber-attacks or other cybersecurity breaches.

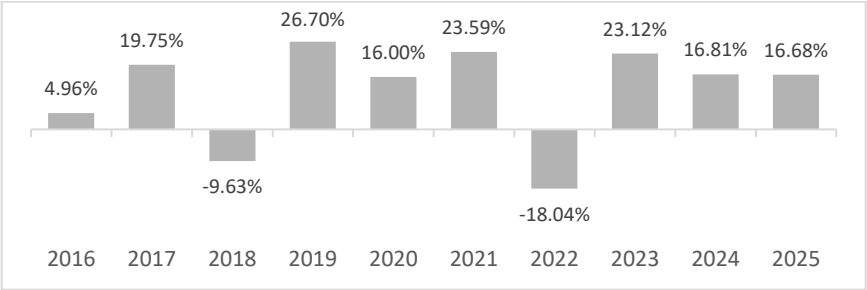

HISTORICAL PERFORMANCE

The following bar chart and table provide information on the Fund's volatility and performance. The Fund's past performance before and after taxes is not necessarily an indication of how the Fund will perform in the future. The bar chart below is intended to provide you with an indication of the risks of investing in the Fund by showing changes in the Fund's performance from year to year for Class I shares. The returns for Class S shares were different than the returns shown below because each class of shares has different expenses.

The table below compares the Fund's performance over different time periods to that of the Fund's broad-based securities market index (the "Index"). The table includes returns both before and after taxes. After-tax returns are calculated using historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts. After-tax returns are shown only for Class I shares; after-tax returns for Class S shares will vary.

The performance information reflects Fund expenses, and assumes that all distributions have been reinvested. Each Index is an unmanaged index and has no expenses. It is not possible to invest directly in an index. Updated performance information is available at the Fund's website at www.sitfunds.com or by calling 800-332-5580.

TAX INFORMATION

The Fund's distributions are generally taxable to you as ordinary income, capital gains, or a combination of the two, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account, which may be taxable upon withdrawal from the tax-deferred arrangement.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fund's shares through a broker-dealer or other financial intermediary (such as a bank or financial adviser), the financial intermediary may impose account charges. The Fund and its related companies may also pay that intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary to recommend the Fund over another investment. Ask your intermediary or visit your intermediary's website for more information.
